## Reconciliation of Non-GAAP Financial Measure

EBITDA is a non-GAAP financial measure. EBITDA is defined as net income (loss) plus interest expense, net, plus income tax expense plus depreciation expense and amortization expense. EBITDA should be considered in addition to, not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. It is not a measurement of our financial performance under GAAP and should not be considered as alternatives to revenue or net income, as applicable, or any other performance measures derived in accordance with GAAP and may not be comparable to other similarly titled measures of other businesses. EBITDA has limitations as an analytical tool and you should not consider it in isolation or as a substitute for analysis of our operating results as reported under GAAP.

EBITDA does not reflect the impact of certain cash charges resulting from matters we consider not to be indicative of ongoing operations and other companies in our industry may calculate EBITDA differently than we do, limiting its usefulness as a comparative measure.
